DETAILED ACTION

Drawings

1. The informal drawings filed on 12-10-2002 which are acknowledge and acceptable for examination purposes only. Formal drawings will be required when the application is allowed.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-5 are rejected under 35 U.S.C. 102(b) as being anticipated by Horie et al (US patent 5,920,767).

With respect to claims 1-5, Horie et al shows in figure 6 an active layer (104) and a plurality of layers in parallel with said activation layer, a first groove (120) penetrating through at least some of said plurality of layers, selectively etching a specified layer (10) among at least some of plurality of layers through which said first groove penetrates, said etching extending from both sides of the first groove to a predetermined position in said specified layer, thus forming a pair of second grooves (on both sides of etching stop layer (10)), filling up said second grooves with material SiN_x having a refractive index higher than that of said specified layer (10) made of GaAs, thus forming two portions having said high equivalent refractive index, note col. 9 line 34 to col. 10 line 48.
